

The Town Hall built in 1813 is the largest Public Meeting building in Kolkata. This Doric architectural structure required restoration after nearly two centuries of wear and tear. The restoration of Kolkata town hall has been a landmark project for **CICO**.

The solution for restoration was provided by **CICO** Technologies Limited after analyzing the problems, **CICO** recommended and used the following products:

Tapecrete P151 for extensive Repair and Rehabilitation

CICO No.1 for preventing salt peter action

CICO Bond EPO as bonding agent for joining old and new concrete

CORCHEM 60I migratory corrosion inhibitor to prevent corrosion
