

# CICO WALL PUTTY

## DESCRIPTION

- : **CICO WALL PUTTY** is a water resistant polymeric putty for concrete/mortar walls and ceilings. It has superior adhesive strength, durability and increases life of paints. It does not require water curing. It renders a smooth and durable surface suitable for all kinds of paint.

## USES

- : It serves as filler/leveler in the paint system and enhances durability.

## FEATURES

- : **CICO WALL PUTTY** provides waterproof surface excellent smoothness, good adhesion, good breathing properties, seals porosity for uniform deposition of finished paint.

## APPLICATION DATA

### SURFACE PREPARATION

- : All the loosely adhering and projecting material from the wall should be removed with the help of wire brush, putty blade or emery stone. The wall surface should be moistened with sufficient quantity of water to saturate the surface as well as to clean the dust/dirt.

### APPLICATION

- : Apply first coat of **CICO WALL PUTTY** uniformly on already cleaned and moistened surface with help of putty blade or trowel. Allow the surface to dry for at least 2-3 hours and then apply 2<sup>nd</sup> coat of putty if required to match with the adjacent area. Allow it sufficient time to dry completely. After complete drying of the surface, if needed the surface should be rubbed with fine waterproof emery paper. The surface is now ready for painting.

## PRECAUTION

- : It should not be applied on surface with flowing water. The water leakage should be first stopped by **CICO** system of waterproofing.

## PACKING

- : Available in 1 kg, 5 kg & 20 kg. Can be tinted to any desired colour by universal strainer.

## SHELF LIFE

- : 6 months in unopened condition.

## STORAGE

- : Store in cool & dry place. Keep container, airtight during handling/storage. Protect from extreme climatic condition.

**SAFETY**

: Non inflammable and non-toxic. In case of skin contact, wash thoroughly with soap & water.

**PRODUCT INFORMATION**

: Although the basic formation of our products generally unchanged, production refinements arising from continuing research and evaluation program may occasionally result in marginal changes in properties.

**TECHNICAL DATA:**

- **CICO** maintain a technical division with highly qualified Technical Personnel to investigate and advise on subjects related to concrete and The Construction Industry. The Division will advise on the correct use and selection of right products at the right place.
- **CICO** undertakes Consultancy Services for diagnosis and rehabilitation of distressed structures.
- **CICO** undertakes jobs as a package for total waterproofing system with Guarantee
